

Co-Labs

by journey

93 LAWRENCE WEAVER RD, CAMBRIDGE CB3 0LE

journey

The Need / Cambridge is leading the world in research and early-stage innovation, but lacks physical space for founders and growing firms to harness it. Instead of being forced to find the few available start-up labs outside Cambridge, **Co-Labs by journey** will provide the urban, fully-fitted lab space companies need —

— so you can focus your time and resources on your venture.

Building 1 / Defra

9 private labs ranging from
4 to 20 benches / private offices
/ co-lab benches & co-working

Building 2 / Old Granary

12 private labs from 2 to 30 benches
/ co-working / private offices

Building 3 / Bingham

9 private labs from 4 to 20 benches
/ private offices

Entrance /
Conference

journey Labs

journey is a real estate company focused on facilitating innovation in key UK knowledge economies. We have a particular focus on the early-stage community. This growing cohort of new companies find accessing the right space and equipment a challenge. Our goal is to bring forward a variety of spaces in central locations that facilitate the seed to growth journey.

Our mission is to enhance the working and living experience of our customers whilst they focus on developing their research and venture. We specialise in delivering flexible and fitted spaces so that our customers can plug-in immediately and focus on their core activities.

Co-Labs by journey will be our first Cambridge lab space focused on start-ups. We will also be bringing forward our second lab start-up hub in 2025.

Co-Laboratories is a lab space provider and community builder that helps startups by being as flexible and connected as they require. We do this through operating our own spaces and in collaboration with partners. Co-Labs by journey, Cambridge will be our first partner site in the UK.

Co-Labs seeks to become a hub which enables small businesses to stay in the Cambridge cluster and facilitate their necessary partnerships at an early stage. We believe the environment is strengthened when they can remain in the area and collaborate more effectively, rather than being forced to vacate city centres due to cost or other reasons. We are partnering with journey by Brydell Partners because they see and understand the need for interconnected spaces to promote the health of the entire ecosystem.

Co-Labs was founded by Laura Grimwood, a scientist forced to relocate to the USA with her startup in 2015 due to lack of appropriate space. The problem wasn't fixed in the 7 years she spent understanding the US startup culture and she has brought the lessons learnt to help the UK infrastructure.
