Dial it Up Q4 2025

- | All-electric building.
- / 140,000 sq ft of office space, with amenities that promote health and wellbeing.
- / Rooftop terrace and adjoining breakout spaces of 4,000 sq ft for collaboration and restoration.
- State of the art end of trip facilities.
- \ Sustainability at forefront of the design - targeting EPC A, BREEAM 'Outstanding' and NABERS 5-Star.

Indicative CGI view of corner of Chiswell Street and Finsbury Street

The building that built a building

Creating a future-proof timepiece

Dials is a story of reuse. A significant proportion of the building is being retained or re-purposed, minimising the upfront carbon impact of the scheme.

Working with our suppliers, we are making best use of the existing materials and structures by crafting them into new features and finishes.

Click to see a short film of the building's story

“A product made from the history of the landscape.”

Sam Frith, Creative Director, Solus

Existing granite being transformed into terrazzo tiles for the reception and amenity spaces.

Indicative CGI of reception

Dialing in the detail

Working with renowned architects Stiff + Trevillion, they have created an environment true to its heritage – making the old new again by retaining, re-using and recycling wherever possible.

Exposing, restoring and retreating the existing steelwork to create an architectural feature and blank canvas for occupiers to make their mark.

Intumescent paint to highly crafted exposed steelwork.

“Taking the old and making it the new again.”

Ian Hamilton, Commercial Director, Solus

A new face

Magna Glass will be used to create striking glazed elements to the building facade. Each ceramic plate will have its own unique characteristics, and will be combined to create translucent green panels that will bring an organic quality to the lower levels of the building, coming to life when back-lit.

Magna Glass is a closed loop circular economy material made from recycled glass bottles using environmentally friendly production processes.

Looking to the future

Dials is designed within the principles of Net Zero Carbon and Whole Life Carbon. The development poses a fabric first and regenerative approach to delivering an architectural and urban design which is aspirational in its sustainability goals.

Putting the circular economy at the heart of materials selection, with a focus on retention and re-use to minimise embodied carbon.

Taking a Design for Performance approach, with a focus on the external envelope and building systems, we are optimising the energy performance at DIALS. This is enabling us to target the following credentials:

Arrival

Arrival

A welcome that is top notch

We've upped the volume and brilliance, creating a new double-height reception, and a dedicated amenity entrance.

Ground Floor

14,698 sq ft Office

A new double-height reception space forms a prominent “front door” to the building, providing direct access to four new high-speed passenger lifts serving all floors.

The light and welcoming amenity lounge is accessible directly from Chiswell Street, with a feature stair linking to the end-of-trip facilities and wellness spaces lower ground floor .

Indicative CGIs of lounge/cafe

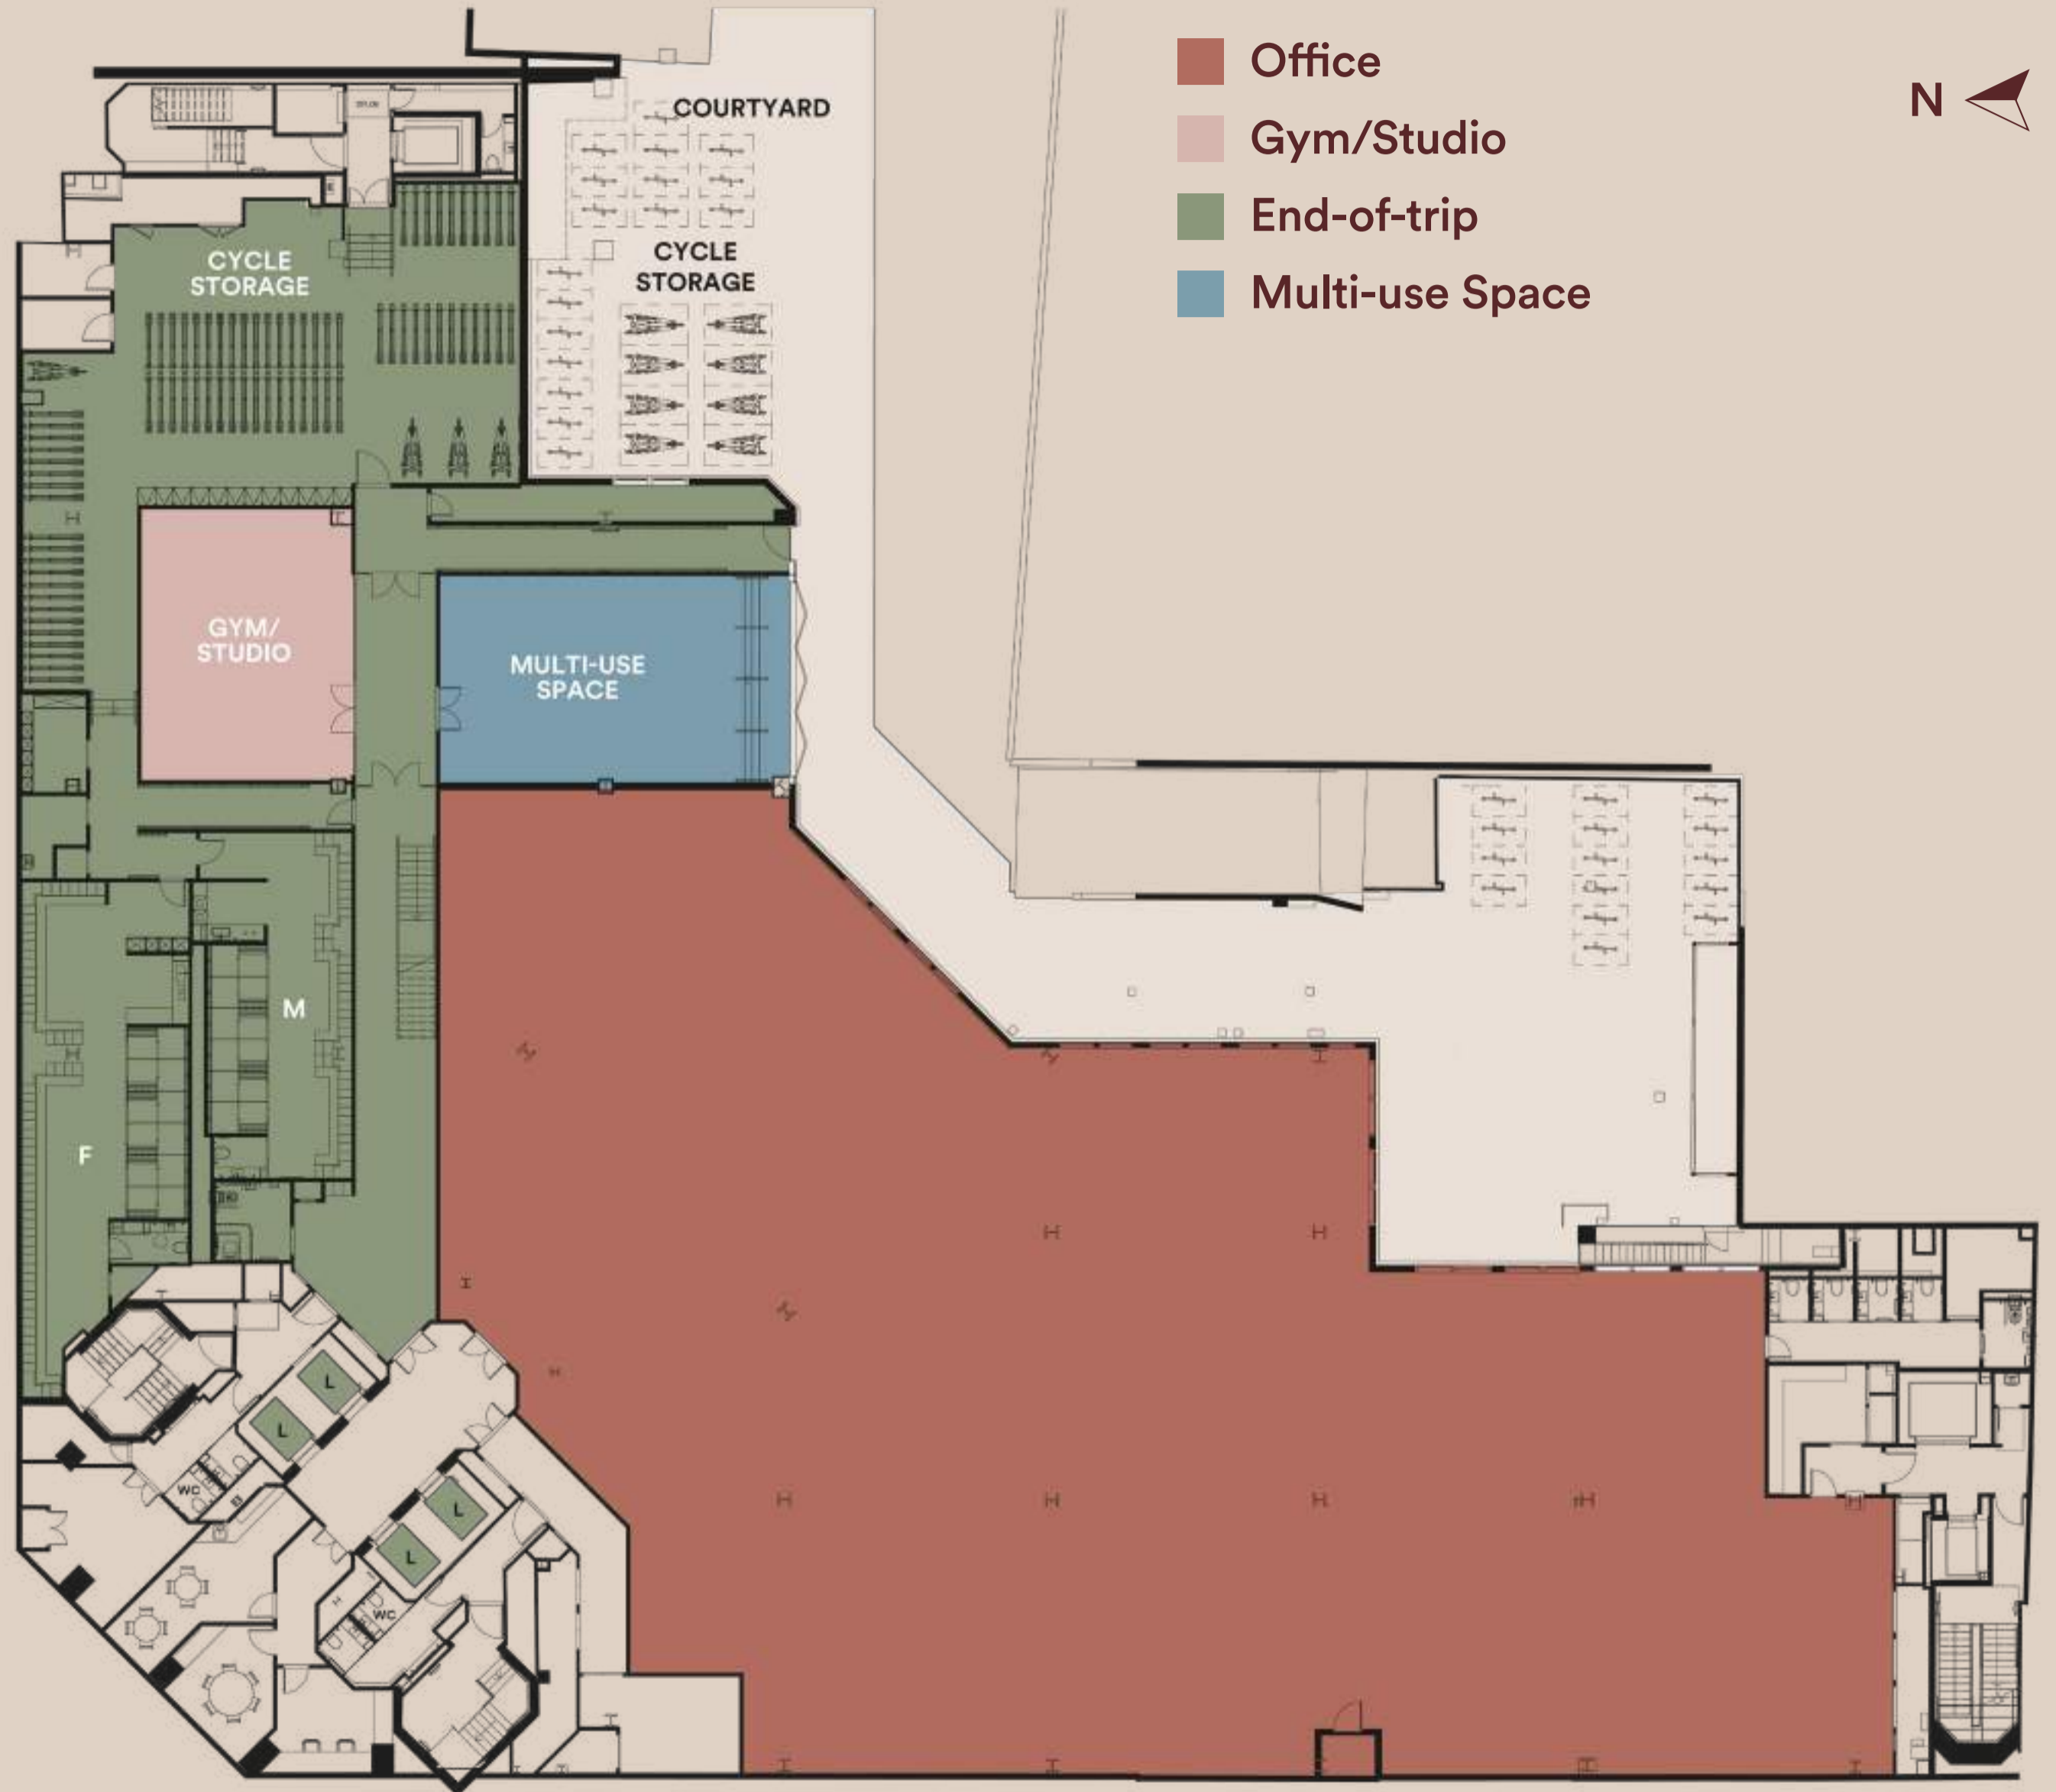

Stop the clock

Take a pause in our light-filled lounge and coffee bar. This relaxing amenity space on the ground floor is the perfect way to start your day.

Lower Ground

11,421 sq ft Office

- | 262 bike spaces
- / Bike maintenance and cleaning station
- ↙ Male, Female & Accessible changing rooms with 13 showers
- 250 lockers
- ↘ External electric charging points
- ↘ Step free access via courtyard

Ticks all the boxes

The building will maximise occupier wellness, through a range of amenities and targeting WELL Platinum.

The best-in-class end of trip facilities will include a gym / fitness studio and a multipurpose amenity space.

Indicative CGIs of amenity spaces

A positive spin

Dials benefits from a dedicated cycle entrance at ground level, with easy access from the courtyard.

There is provision to accommodate charger points for electric bicycles and scooters.

A bike maintenance and cleaning station will also be provided.

Indicative CGI of cycle entrance and multi-use space

The image features a light gray background with several large, thick, red geometric shapes. On the left, there is a large 'X' shape formed by two intersecting bars. In the center, a single bar is oriented diagonally from the bottom-left towards the top-right. On the right side, there are two horizontal bars, one positioned higher than the other. The word 'Availability' is written in a bold, dark red, sans-serif font, centered horizontally and partially overlapping the central diagonal bar.

Summary Specification

- | New double-height reception utilising the latest access control technology for occupier convenience and security
- \ Typical floor plates of approx. 14,578 sq ft (1,354 sq m) – 21,056 sq ft (1,956 sq m)
- Workplace density 1:10 sq m Effective density 1:12.5 sq m
- New all-electric building services, based on VRF condensers and Air Source Heat Pumps
- New high-performance glazing
- / New, highly efficient VRF air conditioning system
- | Slab to slab heights in excess of 4m on all floors providing minimum floor to ceiling heights (assuming traditional suspended ceiling solution) of:
 - 2.7m (Levels 2 – 6)
 - 2.9m (Ground – Level 1)
 - 2.8m (Lower Ground)
- \ Fully accessible raised access floors providing:
 - 170–200mm nom (Levels 3–6)
 - 340mm (Level 2)
 - 330mm (Level 1)
 - 195mm (Ground)
 - 225mm (Lower Ground)
- Four new 1,000 kg (13-person) passenger lifts serving all floors (two going to the rooftop terrace), operating at 1.6 m/s and utilising Destination Control
- 2,000kg goods lift together with two shared firefighting and evacuation lifts
- New male, female, unisex and disabled WCs on every office floor. DDA shower on every floor
- / Fresh air delivered at 14l/s per person, in accordance with BCO 2023, and meeting WELL guidance.

Architects

Stiff + Trevillion

Stiff+Trevillion makes elegant, human-centred architecture that stands the test of time. Architecture is an inclusive, social profession: working with clients, artisans, builders and bureaucrats to create tangible, three-dimensional outcomes. Their work is confident, unpretentious and tasteful, using simple materials in a painterly way to sit with poise within its context.
