WHO WE ARE

Proposition is a charity that provokes transformational dialogue around humanity's relationship with the living world.

Human beings can create thriving biodiverse ecologies while exceeding provision for human needs.

We support emerging artists who are working to raise ecological awareness and farmers who are increasing biodiversity while producing nutritious food. In 2021 Time Out rated our immersive exhibition TERRA NEXUS as one of the top four art shows in London.

Our exhibitions, workshops, artist studios, biodiverse farm tours, lectures and events are all open to the public.

All funds raised from studio bookings go to supporting our charitable activities.
