Sustainable approach. Positive impact.

We take a forward-thinking approach to minimise our impact on the environment, from design and construction through to operation. Working with leading sustainability consultants, Chancerygate embraces the latest technologies and methods to achieve future-proof solutions.

Green initiatives at Nucleus include:

- Solar PV panels on all units*
- High performance insulated cladding and roof materials
- Highly efficient LED lighting
- Low air permeability design
- Electric vehicle charging points
- 15% warehouse roof lights increasing natural day light
- Landscaped communal areas enhancing biodiversity
- External wellbeing areas
- Secure cycle storage to encourage cycling to work

*Potential savings of up to **£0.58 per sq ft** per annum through use of PVs based on using current energy prices as of July 2025 and assuming 100% PV generation is used on site.

Located within the Oxford–Cambridge Arc

The Oxford-Cambridge Arc (the Arc) is a globally significant area between Oxford, Milton Keynes and Cambridge.

It supports over two million jobs, adds over £110 billion to the economy every year and houses one of the fastest growing economies in England. The Arc has the potential to become a world-leading and globally renowned centre for business, innovation and investment in a variety of industries, including AI (Artificial Intelligence), advanced manufacturing and life sciences. Improving connectivity across the Arc with a new rail line between Oxford, Milton Keynes and Cambridge will link communities with employment and leisure opportunities.

Meanwhile, improvements to the A428, around Black Cat roundabout and Caxton Gibbet roundabout, will provide quicker and more reliable journeys to road users travelling between Cambridge and Milton Keynes.
