Office Concept

100 York Blvd, Richmond Hill - Suite #404

colour theory

THE CONCEPT:

Colour Theory is an office that balances calm and creativity through a soft foundation of oak and layered whites. Texture-forward materials add depth and quiet interest, creating a space that feels considered rather than busy. Carefully placed pops of colour bring brightness and energy, expressed through art, accessories, and everyday office supplies. These moments of colour feel intentional, never overwhelming, and invite curiosity and movement throughout the space. The true joy of the office comes from the people within it, whose ideas and personalities activate the design. Playful details coexist with a professional sensibility, supporting both focus and imagination. The result is a modern yet timeless environment where creativity feels natural, confident, and alive.

WHO WORKS HERE?

Designed for designers, strategists and creative thinkers who value both focus and expression. Ideal for architects, writers, consultants, and makers working at the intersection of ideas and execution. A home for innovators, collaborators, and independent professionals shaping thoughtful, forward-looking work.
